

Bulkhead Pass-thru Receptacle

Industrial Ethernet

Physical Media

- Easy Method for bringing an Ethernet connection in from a harsh environment to an industrial enclosure
- Category 5e compliant
- Achieves IEC IP67 rated seal when mated with an RJ-Lnxx cordset – but also compatible with RJ-45 patch cords

Ethernet devices such as PLCs, I/O and even DIN rail mount switches are becoming prevalent items within industrial enclosures, but a problem exists when the Ethernet connection has to leave the enclosure to connect to devices on the factory floor. Use of the RJ-Lnxx® bulkhead pass-thru overcomes this issue by providing a sealed, robust connection on the outside of the cabinet and then a commercial grade patch cord for connection within the cabinet. These pass-thrus can be ordered with a RJ45 or RJ11 jack for connection of any length patch cord for the internal enclosure connection or with 12" of patch cord directly attached.
